Internationalisation

What is an innovatie programme?

- A temporary, regional, cooperation (long term) between governmental parties, companies and knowledge institutes.
- With the goal to stimulate the development of innovation and cooperation in an ecosystem
- By drafting long term goals and targets
- And making funding and capacity available to work on this.

Why an innovation programme?

It takes more than
technology alone to make an
innovation successful

Ecosystem interventions

This requires (regional)
cooperation

Transitions require long term attention

And long-term programme's
